Full-Stack & AI Developer | B.Tech IT | Building scalable web apps and agentic AI pipelines.

Education

8.44/10	BTech in Information Technology, Maharaja Surajmal Institute of Technology, GGSIPU Delhi, India	2023–27
82.6/100	AISSCE (Class XII), Shanti Gyan Niketan Sr. Sec. School Delhi, India	2021–22
87.4/100	AISSCE (Class X), Shanti Gyan Niketan Sr. Sec. School Delhi, India	2019–20
Achievements: 2nd Runner-Up, E-Submit Hackathon — E-Cell Delhi		
Courses: Complete A.I. & Machine Learning Andrei Neagoie, Daniel Bourke · AI Engineer Agentic Track Ed Donner · Delta Web Development Bootcamp Apna College · Alpha DSA in Java Apna College		

Skills

Languages Python, Java, JavaScript, C/C++, SQL, Bash, HTML, CSS
Frontend React 18, Redux Toolkit, Tailwind CSS, Framer Motion, HTML5/CSS3, Responsive Design
Backend Node.js, Express.js, FastAPI, REST APIs, JWT Auth, Middleware
Databases MongoDB, PostgreSQL, MySQL, Firebase / Supabase, Firestore
Agentic AI Anthropic SDK, MCP, LangGraph, CrewAI, AutoGen, OpenAI / Gemini API, NumPy, Pandas
Environments VS Code | Postman | MongoDB Compass | MySQL Workbench | Vercel | Firebase Console

Experience

Geek Room, Web Developer	Sep 2024 – Aug 2025
- Developed and maintained web features and UI components using React and Node.js, improving product usability and frontend performance. - Built and integrated RESTful APIs, contributing to scalable backend workflows and participating in iterative sprint-based development. - Collaborated on code reviews and clean code practices, strengthening proficiency in React, Express, and MongoDB-based systems.	
Energie Clothing, Co-Founder & Team Lead New Delhi, India	Dec 2023 – Jul 2024
- Co-founded a custom apparel venture delivering personalised and bulk orders for college societies and events across Delhi. - Managed end-to-end operations — supplier coordination, order fulfilment, and client communication — maintaining high delivery standards. - Grew the client base through direct outreach and referrals, building a reputation for quality and reliable turnaround.	

Projects

TaskFlow Pro Link	Jan 2025 – Apr 2025
<i>Personal Project</i> - Built a full-featured project management SaaS (Notion × Linear) with a Kanban board supporting drag-and-drop across columns using dnd-kit and Redux for state management. - Implemented auth with Google OAuth via Firebase, persistent sessions, and role-based multi-user workspaces with real-time Firestore updates. - Developed an analytics dashboard (task trends, productivity score, burndown chart) using Recharts; added dark/light mode, Framer Motion transitions, lazy loading, and Vite code-splitting.	
AI Personal Assistant Agent Link	Nov 2024 – Dec 2024
<i>Personal Project</i> - Built a conversational AI agent in Python that answers questions about professional background by reading a LinkedIn profile and resume as context via the OpenAI / Gemini API. - Developed a web interface using FastAPI + HTML/CSS/JS and a Gradio front-end for frictionless local deployment with a carefully crafted system prompt for accurate, in-character responses.	
Agentic AI Workflow Exploration	Ongoing
<i>Learning Project</i> - Building multi-agent pipelines using LangGraph and CrewAI to orchestrate task delegation between specialised AI agents; integrating Anthropic SDK and MCP for tool-enabled agents. - Experimenting with AutoGen for conversational agent loops and NumPy / Pandas for data-processing steps within agentic tasks that call external APIs and local functions.
